## TARGET GROUP

The primary target group consists of trainers selected by the partner organisations and their local partners. These trainers will use the peer training method for being mentors to the secondary target group which will consist of larger group of trainers from the partner communities, as well as decision makers in the field of education who will be involved in developing the local ecosystems of entrepreneurial learning.

Enhanced ENTREpreneurial  
attitude in adult education for a  
better LABour market integration

2018-2020

*This project has been funded with support from the European Commission. This publication reflects the views only of the author, and the Commission cannot be held responsible for any use which may be made of the information contained therein.*

## DESCRIPTION

In order to reduce unemployment, the entrepreneurial education is considered a key factor for competitiveness and employment, social inclusion and personal development. In order to adapt to this need a new type of attitude, initiative and responsibility is required. The valorisation of entrepreneurial attitude will improve traditional education, preparing people for life and offering the opportunities to adult people to find their place in the labour market, either by more easily finding a new job as a result of having an entrepreneurial attitude and mindset, or by starting and running their own business.

The ENTRELAB project aims to incubate and promote the entrepreneurial spirit through the development of a model ecosystem, which will stimulate creativity and entrepreneurship.

## MAIN AIM AND OBJECTIVES

The main aim of the project is to empower trainers to create ecosystems of entrepreneurial learning for adult education, by assuming the role of the drivers of such ecosystems.

The specific objectives of the project are:

- promoting entrepreneurial culture by creating an entrepreneurial ecosystem, oriented to change innovation and creativity;
- developing entrepreneurship at different levels of trainings as an incentive for people through strengthening entrepreneurial initiatives as a source of progress;
- developing entrepreneurial skills among people by raising awareness towards entrepreneurial culture.

## OUTCOMES

The project outcomes will be published on the project website, offering scenario-based guidance to help trainers and adult educators across Europe to deliver entrepreneurial education and learning. As a result of the intellectual outputs planned to be realised in the project, the following key outcomes will be produced during the two years project:

- ENTRELAB online platform with different interactive functionalities;
- ENTRELAB entrepreneurial guide “European opportunities in entrepreneurial education”;
- ENTRELAB training kit “Entrepreneurial learning in adult education”;
- Ebook ENTRELAB “Enhanced ENTREpreneurial attitude in adult education for a better LABour market integration”
